

C2 Options Exchange Weekend Test Reminder: Saturday, February 24, 2018

Overview

The Cboe C2 Options Exchange integration remains on track for a **May 14, 2018** migration to Bats technology. All milestones referenced below have been achieved on target, and with the new platform go-live date quickly approaching, the Cboe team is working hard to ensure C2 customers will be ready for the migration date. To aid in your readiness and planning, we encourage C2 Trading Permit Holders (“TPHs”), vendors and market data recipients to participate in the first weekend test scheduled for **Saturday February 24, 2018**.

IMPORTANT: Only C2 TPHs and vendors that have completed their formal certification for the new trading platform will be eligible to submit order to the new C2 production system.

TPHs that wish to schedule a formal certification must first complete sufficient unattended testing and review the [Certification Script](#) prior to requesting a certification appointment. Appointments can be scheduled by emailing their request to the Cboe Trade Desk (tradedesk@cboe.com).
