

C2 Options Exchange to Decommission Order View File

Overview

Effective upon the completion of the C2 migration to the Bats technology on **Monday, May 14, 2018**, the C2 Options Exchange will decommission the Order View File.

On the same date, the C2 Options Exchange will introduce the GTC/GTD Open Orders Report available through the [Customer Web Portal](#). Further details on the GTC/GTD Open Orders Report can be found on the [Customer Web Portal Specification](#).

We recommend customers make use of a real-time Order by Order Logical Drop Port (ODROP) or the Order Lookup Tool to maintain visibility of full order activity.

More Information

For more information regarding the migration to the Bats technology platform, please refer to the [Cboe Integration Website](#). Also please refer to the technical specifications referenced below for additional details regarding the Customer Web Portal, GTC/GTD Open Orders Report and Order Lookup Tool.
