

Cboe Announces Availability of Physical Ports Tool in Customer Web Portal

Reference ID: C2018051002

Overview

Cboe is pleased to announce the availability, effective immediately, of the new Physical Ports tool in the [Customer Web Portal](#). This tool is available to all customers with physical connectivity to Cboe.

Details

Using the Physical Ports tool, Cboe customers can view the following physical port data:

- Firm ID (four-letter ID of the port owner)
- Connection ID (typically the data center assigned cross connect ID or circuit ID)
- Data Center (two-letter code for data center)
- Market (Equities/Options Exchange, Futures, Foreign Currency)
- Interface IP Address (transit peer IP address/CIDR block)
- Billing Start (date billing commenced)
- Billing End (effective decommission date)
- Bandwidth (interface speed setting 1G or 10G)

In addition to the information above, firms will be able to select a Connection ID and view all Cboe multicast market data subscriptions over the selected port.

Access to the tool may be granted by any firm's Account Administrator through the [User Management](#) tool in the Customer Web Portal.

Additional Information

For more information refer to the following technical specification:

- [US Customer Web Portal Specification](#)

Please contact the Cboe NOC or Trade Desk with any questions. We appreciate your continued support and will work hard every day to keep earning your business by powering your potential to stay ahead

of an evolving market. As always, we are committed to our customers and to making markets better as your partner in trading.
