

Frequent Trader ID Field Available on Cboe Trade Match (CTM) Terminal

Overview

Effective **Monday, March 19, 2018**, a new Frequent Trader ID (FTID) field will be available on the Cboe Options Exchange CTM terminal trade browse screen. This enhancement will allow Trading Permit Holders (TPHs) to add or modify FTID information on post-trade records for the current business day. TPHs that require FTID modifications on trade records which occurred on past business days, limited to within the last 3 business days, must continue to submit these changes according to the procedure detailed in Regulatory Circular – [RG16-040](#). In addition, the FTID field may be changed by the TPH via the CTM terminal without notice to the Exchange.

Additional Information

Questions may be directed to the Cboe Operations Support Center (OSC).

We appreciate your continued support and will work hard every day to keep earning your business by powering your potential to stay ahead of an evolving market. As always, we are committed to our customers and to making markets better as your partner in trading.
